

Bradford J. Stipes, PE Senior Vice President

“Do all the good you can,
By all the means you can,
In all the ways you can,
In all the places you can,
At all the times you can,
To all the people you can,
As long as ever you can.”
~~ John Wesley (1703-1791)

Understanding and caring about people's needs are central ingredients in successful project planning and development. As understanding increases, so does the effectiveness of the professional planning and engineering services we offer. From Brad's 20-year career in infrastructure planning and design, and community involvement, he has derived a practical understanding of the big picture that relates responsible infrastructure development, context and environmental sensitivity, and sustainable quality of life.

The Transportation program at Anderson & Associates includes comprehensive traffic planning & engineering, roadway design, transportation system management, and construction phase services. Moving our client's projects forward is a big deal; it's a responsibility we take very seriously. Our project managers and team members are thoroughly committed to providing timely, cost-effective, and quality-assured deliverables. Our service area includes five states, and our client base is comprised of a wide array of public and private entities; state and local governments, educational institutions, and private interests. The basis for our success has been a desire to understand client needs and to formulate and carry out innovative, reliable solutions to meet these needs.

Biographic Highlights:

- Blacksburg High School
- Virginia Tech Civil Engineering
