

# Surveying

Anderson & Associates, Inc. has been providing professional surveying and mapping services since 1968. Our experience extends through the entire project from the initial property owner notification, through delivery of the final base mapping, construction stakeout, and on to topo for final quantities. Our survey crews provide professional surveying services for roadway, railway, airport, bridges, stream, utility, and regional mapping projects as well as aerial mapping. Our clients receive top-notch service, in part because we equip ourselves with first-rate equipment, AutoCAD, and Land Development Desktop computer aided drafting and design software.

- ◇ Roadway Projects
- ◇ Railroad Projects
- ◇ Airport projects
- ◇ Land Development Projects
- ◇ Utilities
- ◇ Aerial Mapping
- ◇ Bridges

*Focused on Service,  
Focused on You*
